Professional Summary

IT Support and Server Operations Technician with mid-level experience deploying and maintaining data-center server infrastructure. Delivered end-to-end rollout of new rack-mounted servers and network devices across multiple projects, and built a secure home-lab environment using Synology NAS, routers, and switches to host internal services. Skilled in component-level repairs, OS and network troubleshooting, and data security compliance. Ready to apply this expertise to ensure reliable, secure server operations for your organization.

Technical Skills

- **Data Center Operations:** Preventative & Reactive Maintenance, Component-Level Troubleshooting, Equipment Diagnostics, Root Cause Analysis, Break/Fix Support, Troubleshooting Computer/server Hardware, Server Hardware Maintenance, Troubleshooting Operating Systems
- **Facility Systems:** Building Management System (BMS), HVAC, UPS & PDU Monitoring, Power Distribution--, Environmental Monitoring, Mechanical & Engineering Systems
- **IT Systems:** Linux Fundamentals, Windows Server Basics, TCP/IP Networking Fundamentals, Kubernetes, Docker, Terraform, Helm, ArgoCD, CI/CD (Jenkins), Network Configuration, Linux Cluster Software, Network Devices Routers, Network Devices Hubs, Network Devices Bridges, Network Devices Switches
- **Operations & Compliance:** Work Order & Ticket Management, Documentation & Reporting, Safety Compliance & PPE Standards, Regulatory & Audit Compliance, Vendor/Subcontractor Coordination, Microsoft Office (Word, Excel, Outlook)

Professional Experience

MaxPro Inc.

Aug 2024 - Present

Data Center Technician, Server Ops

- Deploy and operate new data center infrastructure by racking, stacking, cabling, and configuring servers and network switches with Linux tools and Helm, delivering fully ready equipment on schedule and meeting standard procedures
- Reported issues and followed data center procedures to troubleshoot and diagnose straightforward issues with servers, operating systems, and networking protocols, applying appropriate resources and escalating when necessary to restore service.
- Maintain data security and integrity by tracking media, securely erasing data according to audit standards, and handling equipment per security policies, which ensures compliance and prevents unauthorized data exposure
- Disassembled and rebuilt specific equipment that reached end-of-life through part replacement and maintenance, working in a team setting to safely decommission hardware and reclaim reusable components.
- Repaired, fixed, and performed preventative maintenance on servers, machines, and related infrastructure based on identified issues with defined solutions, minimizing downtime and improving equipment reliability.
- Diagnosed and troubleshot Linux-based cluster software and network devices (routers, hubs, switches) using SSH, log analysis, and tcpdump, restoring network connectivity and improving overall performance in the data center

L&T Technology Services

May 2021 - Aug 2022

IT Support Technician – Server & Network Operations

- Assisted in deploying and operating server and network infrastructure in lab and server-room environments by installing components, connecting network switches, and validating configurations against checklists, which ensured the environment met readiness standards before production
- Performed component-level repairs and troubleshooting on computer and server hardware and peripherals using diagnostic tools and documented procedures, restoring equipment functionality and preventing downtime
- Diagnosed and troubleshot operating systems and networking protocols such as TCP/IP by analyzing system logs, testing connectivity with ping and Wireshark, and applying standard fixes, which restored normal operations and reduced service interruptions
- Executed preventative maintenance on servers and IT infrastructure, including firmware updates, hardware inspections, and basic break/fix tasks, following defined procedures, which extended hardware lifespan and maintained compliance
- Maintained documentation and incident records in the ticket-management system, tracking data handling, access, and remediation actions, supporting security compliance and enabling quicker incident reviews
- Provided 24/7 IT support on shift schedules-including nights, weekends, and holidays-by troubleshooting network switches, server hardware, and HVAC controls, managing work orders and tickets in the ticketing system, and performing equipment lifts, bending, and standing as required, which kept critical systems running with 99% uptime

Additional Technical Projects

Home Lab Server & Network Infrastructure

- Built a home lab server and network environment, configuring Synology NAS, routers, and switches to host internal services and public-facing websites.
- Implemented network segmentation, access controls, and monitoring on the Synology NAS and home network to improve reliability and security of hosted websites.
- Configured server operating systems, storage shares, and user access policies on Synology NAS to support secure data handling and integrity for hosted services.

Networked Web Hosting Platform

- Configured a Synology NAS-based web hosting platform, deploying multiple websites and applications over a secure home network infrastructure.
- Troubleshooted connectivity, DNS, and routing issues across home routers, switches, and NAS services to ensure consistent uptime for hosted sites.
- Monitored server performance, network traffic, and uptime for hosted websites, applying troubleshooting procedures to resolve straightforward issues and maintain reliable service.

Home Network Design & Optimization

- Designed and optimized a small-scale home network with VLANs, QoS, and secure remote access, integrating a Synology NAS server for storage and self-hosted services.
- Documented home network topology, configuration standards, and maintenance procedures to streamline troubleshooting and ensure consistent, audit-ready operations.

Education

University of Memphis <i>Master of Data Science, Data Science</i>	2022 - 2024
KL University <i>Bachelor of Technology, Computer Science</i>	2017 - 2021

Certifications

- Google IT Support Professional Certificate
